## EXPERIENCE

---

**Co-Founder, Product Owner, Lead Developer** 2017-2020  
*canX GmbH*

I managed a team of 2 other Developers, designed a micro-payment solution, and created our microservice architecture, custom multimedia player, and video CDN

**Co-Founder, Lead Developer** 2021-2022  
*pog.network*

I managed a team of 3 other developers and designed a new proof-of-stake-based cryptocurrency protocol

**Solo Founder** 2021-2022  
*keygate.io*

I'm creating an open-source identity management solution focused on startups creating web and mobile apps

**Freelancing** 2021-present  
*Henry Gressmann Software Engineering*

I've worked with various companies ranging from startups in the fin-tech space to enterprise software

I've been creating production-ready software for more than six years. I'm currently working on creating developer tooling, application security, and react/react-native apps. The core technologies I currently work with are Rust, Typescript, React, and containers (Docker).

You can check out the full portfolio of my work on [henrygressmann.de/work](http://henrygressmann.de/work)
